

New multimode high-power laser light engine

THE BRIXXHUB ULTRA IS THE PERFECT FIT FOR APPLICATIONS IN WIDEFIELD LASER ILLUMINATION.

As the first highly integrated multimode high-power laser light engine on the market, the **new BrixXHUB Ultra** is the perfect fit for applications in **widefield laser illumination**.

At the core of the BrixXHUB Ultra is the integration of up to 6 high-power BrixX lasers, offering a **wide range of wavelengths between 375 and 1550 nm** at **up to more than 5 Watts per wavelength**. This, combined with 6 analog and digital modulation inputs, provides unique flexibility to meet the dynamic needs of your projects.

The system is designed for user-friendly operation and is fully equipped with all essential accessories, allowing you to promptly start your projects without any delays. In addition, its **user-upgradeable design** allows for easy customization, enabling you to adapt to evolving project requirements effortlessly.
